

## QUALITY MANAGEMENT POLICY

The main activity of the company APIN projekt d.o.o. is the design of fire protection systems, construction supervision and consulting services in the segment of stable fire protection systems.

With more than 1000 completed projects, we are the leading company in the design of stable fire protection systems in the Republic of Croatia. Knowledge, experience and the implemented ISO 9001 quality management system are a guarantee of uniform quality of our services.

Since it is the design and professional supervision of the execution of stable fire protection systems and technical protection systems highly professional and responsible activity in order to achieve a uniform quality of our service, we harmonized the company's operations with the ISO 9001:2015 norm using its preventive context in the management of our business processes.

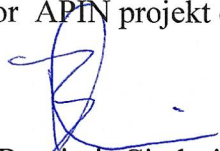

In designing, we respect Croatian laws and regulations as well as other international regulations and standards accepted in the Republic of Croatia. In our project solutions, we incorporate the latest technical achievements, which we regularly adopt at international trainings. The term design plan and the deadlines accepted in them are for us an obligation that is not allowed to be violated by our employees under any circumstances.

The goals we maintain thanks to our quality policy:

- Investor satisfaction
- Supplier satisfaction
- Uniform quality of service
- Constant professional development of employees
- Employee motivation (responsible behavior, teamwork, personal commitment of employees, )
- Employee satisfaction
- Satisfaction of the owners of APIN projekt d.o.o
